

TEETUBE

Circular Profile Junction Connectors
Connecting solutions ideal for use for tight space applications with high protection requirements (IP68).

TEE DRUM

Compact Circular Terminal Blocks
Compact terminal blocks which can be used individually or installed in TEETUBE® junction connectors.

TEE GLAND

IP68 Waterproof Innovative Cable Glands
Cable glands made with the innovative twin shot technology of the seal that permit simple and safe installation.

Quick and reliable answer in the field of electrical connections.

TEEfamily®:
High performance and innovative solutions for electrical connections (up to IP68)

TEE PLUG

Plug and Socket Connectors
Plug and socket solutions, panel-mounting and special versions for indoor and outdoor applications including quick installation products.

TEE BLOCK

Compact Linear Terminal Blocks
Compact terminal blocks which can be used individually or installed in TEEBOX® junction boxes.

TEE BOND

Quick Locking Cable Clamps
Intuitive and rapid solutions for cable clamping even for complex wiring already completed.

Compact-size solutions for use for tight space applications.

Quick-connecting solutions for cost-saving installations.

Intuitive and reliable to prevent installation errors.

TEE BOX

Junction Boxes
Connectors and junction boxes of small and medium dimension ideal for use for tight space applications with high protection requirements (IP68).

TEE BOX

Current Distributors
Prewired current distributors featuring plug & socket connectors ideal for use for applications where fast and flexible installation is a prerequisite.

Hybrid and Custom Solutions
The combination among TEEfamily® series and custom products allow maximum versatility for our partners.

Lighting

LED, Architectural, Urban, Street, Flood, Markers, Entertainment, Pool, Underwater, Trade fairs, Billboards, Stadium

Building installation

Outdoor and Indoor Lighting, Electrical Wiring, CCTV, Heating-Air Conditioning, Installation with distribution boxes, panel, cable tray, duct and trunking systems

Industry

Automation, Machinery (Metal and Wood, Food & Beverage, Packaging, Robotics, Assembly and Handling, etc), Industrial Controls, Washing Machines, Motors

Transportation/Marine

Rail, Train, Trams and Metros, Marine environments, Shipbuilding, Caravan, Yacht, Safety signalling, Chairlifts, LED boat

Infrastructures

Road, Tunnel, Airport, Port, Underground, Railway, Bridge, Emergency Lighting, Dam, Sport, Cable-Car

Heating - Cooling

Heating, Ventilation, Air Conditioning, Frost protection systems, Heating traces, Industrial refrigerator, Vending Machines, SPA, Hot-tubes, Tyre Warmers

Process plants

Water treatment and sewage, Monitoring equipments, Submersion pumps, Power Distribution LV, Petrol stations, Mines, Irrigation, Agriculture and Farming, Green houses

Energy

Wind tower, Solar lighting, Inverter, Biogas Plants

TECHNOLOGY & INNOVATION

xDRY

ELECTRICAL CONNECTORS IP68 ANTICONDENSATION

Reduce installation costs
Fast connections with the insulation piercing clip terminal blocks. (cables from 0.5 - 1.5 mm²)

Choose reliable solutions
Glands and nuts with anti-vibration properties resist the tendency to become loose over time and hence ensure the integrity of the gland/nut seal. (available in July 2014)

Enhance your installation
Quality materials (PA6/PA66 UL94 V0/V2) with excellent resistance to aging under special conditions (hot / cold, oils, vapors, etc.).

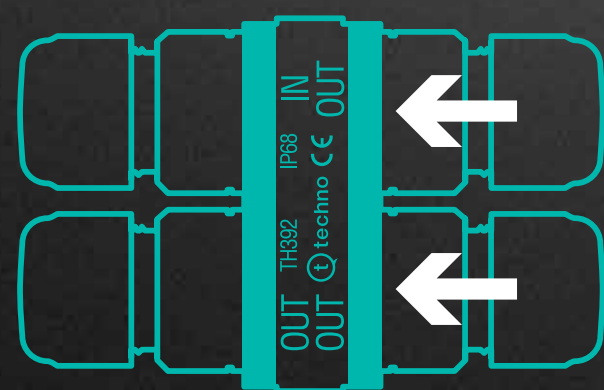

Simplify the job
Innovative design, few components and intuitive wiring systems ensure error-proof and quick installations

Real size

IP68

-30m (3bar/2h)

STOPS
CONDENSATION

-40°C
+125°C

→ 1 IN
← 3 OUT →

Enhanced safety IP68²

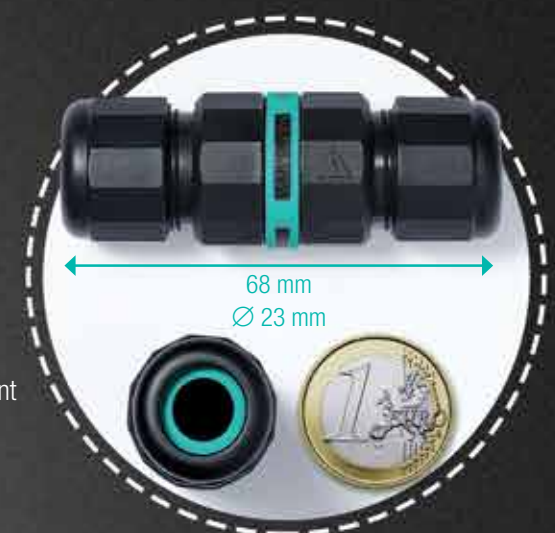

Anti-condensation versions

The special barrier prevents moisture condensation, which runs through the cable, from entering the connector and protects the system in critical conditions of use

RESIN-GEL FREE

Follow the innovation
A specific technology of twin-injection of seals for waterproof installations (IP68). Certified Products.

Extend the usability
Compact for installation in tight spaces. Versatile for use in a variety of plant and machinery.

Pick-up your xDRY!
Wide range of connectors: cable joiners and plug-socket connectors for quick, reliable and flexible installations. 2-6 poles. Max 17.5A/450V AC.
