ELECTRICAL CONNECTORS IP68 ANTICONDENSATION

Outdoor Lighting IP68 LED luminaires demand for smaller connectors

TH391: Stops condensation

The anti-condensation system prevents moisture condensation, which runs through the cable, **from entering the connector and goes beyond it to reach the device installed.**

Compact solutions

Small size for installation in tight space. Versatile for use in a variety of lighting devices.

Enhance your installation

Quick and easy wiring. The connection can be re-inspected at any time. The seal is not lost or forgotten by the installer.

Follow the innovation

A special technology of twin-injection of seals for waterproof installations (IP68). Certified products.
